Avoid large layout shifts — 2 elements found

Avoid long main-thread tasks $-2 \log tasks$ found

PASSED AUDITS (27) Show

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on <u>conducting an accessibility review</u>.

NOT APPLICABLE (27) Show

Best Practices

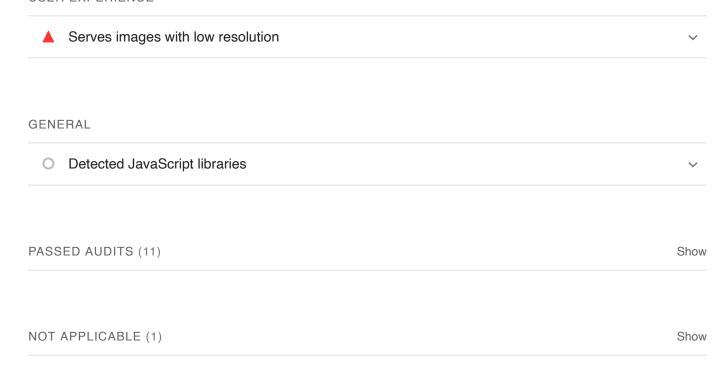

TRUST AND SAFETY

Includes front-end JavaScript libraries with known security vulnerabilities — 9 vulnerabilities detected

Ensure CSP is effective against XSS attacks

10/19/22, 1:48 PM Lighthouse Report

USER EXPERIENCE

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more.

MOBILE FRIENDLY

▲ Tap targets are not sized appropriately — 35% appropriately sized tap targets

Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. Learn more.
